SATTERFIELD & PONTIKES WINS NATIONAL CONSTRUCTION AWARD

NEW ORLEANS, LOUISIANA (January 16, 2012) – The historical renovation of five Jackson Barracks buildings in New Orleans was selected as one of the most significant construction projects of 2011, Engineering News-Record (ENR) announced recently. As a result, Satterfield & Pontikes Construction Group, LLC (S&P), the project’s contractor, was one of only 18 firms nationwide to receive a Best of the Best Award.

The 18 national award-winning projects had already won a main category in their respective ENR regions. A total of 737 entries were submitted by owners, contractors and design firms from all 50 U.S. states for the regional competitions.

The national panel of industry expert judges looked at 119 winning regional projects. They were tasked to select the ‘Best of the Best’ Projects of 2011 on behalf of ENR – one project to represent each of the 18 major construction categories (education, renovation, transportation, office, etc.) in the entire U.S. Projects were judged based on criteria such as safety, innovation, teamwork and design and construction excellence.

Satterfield & Pontikes performed extensive renovations to upgrade historic garrison structures at Jackson Barracks in New Orleans. S&P served as the general contractor for the project that brought five of the two-story structures back to life. S&P restored the wood-framed and masonry buildings according to strict historical renovation guidelines.

The garrison is on the National Register of Historic Places. The restoration was subject to several layers of review by federal and state historic preservationists. The 17,785-square-foot project required extreme care and meticulous craftsmanship to restore the buildings to their former beauty and prominence while maintaining their historical accuracy.

The national winning projects will be profiled in the February 13, 2012 issue of ENR.

About Satterfield & Pontikes Construction

Established in 1989, Satterfield & Pontikes Construction, Inc. is an award-winning general contractor and construction manager. S&P is recognized as one of Engineering News-Record’s Top 400 Contractors and Top 100 Green Builders in America.
