**SATTERFIELD & PONTIKES CONSTRUCTION, INC.  
TAKES TOP AWARD IN *TEXAS CONSTRUCTION* BEST OF 2010**

HOUSTON - September 3, 2010 – **Satterfield & Pontikes Construction, Inc.** (S&P) was selected as this year’s recipient of the prestigious Judges Award in the *Texas Construction* magazine Best of 2010 competition for its work on the NASA LEED Office Facility for Transition at the Johnson Space Center in Houston. The project was judged as the most exceptional project out of 180 contest entries.

The NASA LEED Office Facility for Transition also was judged as Best in Category from all entries for Best Green Building. As a Best in Category winner, the project will be entered into the National Best of 2010 competition and judged against winners from other regions.

S&P’s project for NASA is a remarkable example of environmentally responsible and resource-efficient construction. The NASA LEED Office Facility for Transition was built to extremely stringent standards and earned enough points to become Platinum-certified, the highest LEED designation attainable for ‘green,’ or sustainable, construction.

The *Texas Construction* Best of 2010 recognizes commercial construction and design excellence for projects in Texas and Oklahoma. In addition to the Judges Award and Best of Category Award for the NASA project, Satterfield & Pontikes Construction was selected for three Awards of Excellence for outstanding construction:

- Texas A&M Health Professions Education Building, Bryan – Excellence in Higher Education/Research
- Primary Health Clinic, Fort Sam Houston, San Antonio – Excellence in Health Care
- Cibolo Green Elementary School, San Antonio – Excellence in K-12 Education

“We are very pleased to receive this prestigious recognition,” said George A. Pontikes, Jr., President/CEO of S&P. “It is acknowledgement of outstanding performances by talented and skilled S&P teams and further demonstrates our commitment to delivering exceptional results for our customers.”
