**S&P WINS ABC EXCELLENCE IN CONSTRUCTION EAGLE AWARD**

**SAN ANTONIO, TEXAS** (November 18, 2011) – Satterfield & Pontikes Construction, Inc. (S&P) recently won the top award in the 2010 Associated Builders and Contractors, Inc. (ABC) South Texas Chapter Excellence in Construction competition in the Institutional-Publicly Funded category. The Eagle award, signifying construction's highest honor, was presented to S&P for outstanding construction on the Armed Forces Reserve Center project in San Marcos. By winning the local chapter award, the project is eligible for the upcoming national competition.

Designed by Atkins (formerly PBS&J), the Armed Forces Reserve Center (AFRC) is a training facility for 600 members of the U.S. Army Reserve and Texas National Guard. All three buildings were constructed using a total precast concrete building system and successfully met the U.S. Green Building Council's Leadership in Energy and Environmental Design (LEED) Gold criteria as well as the Department of Defense Anti-Terrorism/Force Protection standards.

The U.S. Army praised S&P's work on this design-build project for being one of a few centers completed ahead of schedule out of more than 80 being constructed throughout the United States. This AFRC is a standout among the scores of Corps of Engineers 2011 projects and serves as an excellent example of the outstanding results that can be achieved using a total precast concrete construction process.

The ABC Excellence in Construction competition is held each year at the chapter level across the country to recognize the best of the best construction projects and in the San Antonio region, dozens of entries were submitted. Judging criteria included overcoming challenges, teamwork, safety, innovation, contribution to the industry/community, construction quality, craftsmanship, and function and aesthetic quality of the design.
